

Threaded Bars

Stainless Steel

• Material:	Stainless Steel (A2)
• Application:	Threaded Bar is often used to fasten wood or metal together and can be cut to a custom length where a standard component isnt suitable. Threaded bar is also used for stabilising structures, automotive repair, and within plumbing and electrical installation. This bar is fully threaded and therefore allows fixings to be fastened to it down its entire length. A2 Stainless Steel provides corrosion and oxidation resistance.
• Manufacturing Standard:	DIN 976-1

Part No.	Finish	Thread diameter	Thread pitch (mm)	Length L (mm)
SR16	Natural	M6	1.00	300
SR18	Natural	M8	1.25	300
SR20	Natural	M10	1.50	300
SR22	Natural	M12	1.75	300
