

F39A – Cable Tie Tool

▶ Operating Instructions

1. Manually tighten the stainless steel tie.

2. Adjust the tensile value of the tie gun.

3. Insert the tip of the tie into the tie gun ensuring the head is close to the cutting point

4. Squeeze the trigger to tighten up the tie.

5. When the tensile strength of the tie reaches the tensile value on the tie gun, the blade will cut off the tie.
