4. FIRST AID MEASURES

GENERAL ADVICE: In all cases of doubt, or when symptoms persist, seek medical attention. Never give anything by mouth to an unconscious person.

INHALATION: Remove to fresh air, keep the patient warm and at rest. If breathing is irregular or stopped, administer artificial respiration. Give nothing by mouth. If unconscious, place in recovery position and seek medical advice.

SKIN CONTACT: Remove contaminated clothing immediately and wash affected skin with soap and water. DO NOT use solvents or thinners as skin cleaning agents.

EYE CONTACT: Contact lenses should be removed. Promptly wash eyes with lots of water while lifting the eyelids. Continue to rinse for at least 15 minutes and get medical attention.

INGESTION: If swallowed, seek medical advice immediately and show this container or label. Do not induce vomiting.

5. FIRE-FIGHTING MEASURES

SUITABLE EXTINGUISHING MEDIA:

Recommended use: Alcohol resistant foam, carbon dioxide (CO₂), dry powder, water spray. Do not use water jet. Cool containers with spray water.

EXTINGUISHING MEDIA WHICH MUST NOT BE USED FOR SAFETY REASONS: SPECIFIC HAZARDS:

Do NOT use high pressure inert gas or water jets.

Fire may produce dense black smoke containing hazardous combustion products (see heading 10). Decomposition products may be a hazard to health. Do not allow run-off from fire fighting to enter drains or water courses.

SPECIAL PROTECTIVE EQUIPMENT FOR FIREFIGHTERS:

In the event of fire, wear self contained breathing apparatus.

6. ACCIDENTAL RELEASE MEASURES

PERSONAL PRECAUTIONS:

Remove all sources of ignition. Ensure adequate ventilation. Evacuate personnel to safe areas. Avoid breathing vapours. Refer to protective measures listed in sections 7 and 8.

ENVIRONMENTAL PRECAUTIONS:

DO NOT allow to enter drains or watercourses. If the product enters drains or sewers, the local water company should be informed immediately. In the case of contamination of streams, rivers or lakes, inform the relevant environment Agency. Vapours are heavier than air and may spread along floors. Vapours may form explosive mixture with air.

METHODS FOR CLEANING UP:

Contain and collect spillage with non-combustible absorbent materials, (e.g. sand, earth, vermiculite, diatomaceous earth) and place in a suitable container for disposal in accordance with the waste regulations (see section 13). Clean the spill area preferably with a detergent. Avoid the use of solvents.

7. HANDLING AND STORAGE

HANDLING:

Keep, the aerosol in a cool, dry place. Exclude sources of heat, sparks and open flame. Do not use sparking tools around aerosols. Avoid skin and eye contact. Avoid inhalation of vapour and spray mist. For personal protection, see section 8. Prevent the creation of flammable or explosive concentrations of vapour in air and avoid vapour concentrations higher than the occupational exposure limits. Never apply pressure to the aerosol, the aerosol is a pressurised object and may explode if pressure is applied.

GENERAL:

The accumulation of vapours in an enclosed space may result in spontaneous combustion, use only in well ventilated areas. Use responsibly and in the correct manner. Wear the appropriate personal protective equipment, as outlined in section 8.

STORAGE

Observe label precautions. Store between 5 and 25°C in a dry, well ventilated place away from sources of heat, ignition and direct sunlight. No smoking. Store separately from oxidising agents and strongly alkaline and strongly acidic materials.

8 . EXPOSURE CONTROLS/ PERSONAL PROTECTION

CHEMICAL NAME:

ENGINEERING MEASURES:

Provide adequate ventilation. All PPE used to control exposure to hazardous substances must be selected to meet the requirements of the COSHH regulations.

PERSONAL PROTECTION EQUIPMENT:

RESPIRATORY PROTECTION:

If exposure to hazardous substances identified cannot be controlled by the provision of local exhaust ventilation and good general extraction, suitable respiratory protective equipment should be worn.

HAND PROTECTION:

When skin exposure may occur, advice should be sought from glove suppliers on appropriate types and usage times for this product. The instructions and information provided by the glove supplier on use, storage, maintenance and replacement must be followed. Barrier creams may help to protect exposed areas of skin, but are not substitutes for full physical protection. They should not be applied once exposure has occurred.

EYE PROTECTION:

Eye protection designed to protect against liquid splashes should be worn.

SKIN & BODY PROTECTION:

Grossly contaminated clothing should be removed and the skin washed with soap and water or a proprietary skin cleaner.

9. PHYSICAL AND CHEMICAL PROPERTIES

FORM: Aerosol
FLASHPOINT: Not known for blend
COLOUR: Clear
ODOUR: Aromatic

10. STABILITY AND REACTIVITY

STABILITY:

Stable under the recommended storage and handling conditions (see section 7).

CONDITIONS TO AVOID:

Applying heat or pressure to the aerosol may result in explosion and fire. Naked flames, smoking, wet and damp storage conditions and mishandling may also result in explosion and fire. Keep away from oxidising agents, strongly alkaline and strongly acidic materials in order to avoid exothermic reactions.

MATERIALS TO AVOID:

HAZARDOUS DECOMPOSITION PRODUCTS:

In a fire, hazardous decomposition products such as smoke,
